#### OVERVIEW

Since 1949, the AAB-MLE Proficiency has made comprehensive external quality control programs available to every individual and clinical laboratory wishing to participate. Updated continuously since their inception, these programs meet the needs of evolving techniques and concepts in the modern laboratory.

**Regulatory Agencies**—The programs noted in the Analyte Index are approved by Centers for Medicare & Medicaid Services (CMS formerly HCFA) and accepted by Commission on Office Laboratory Accreditation (COLA), Joint Commission on Accreditation of Healthcare Organizations (JCAHO), American Association of Laboratory Accreditation (A2LA), and all state agencies.

The College of American Pathologists has accepted AAB-MLE as an alternative proficiency testing (PT) provider. Be aware that the College of American Pathologists approves alternate PT providers on an analyte by analyte basis. Please review the analyte index on the following pages for specific College of American Pathologists accepted analytes. The most current list can be found at **www.aab-pts.org**. Please verify that you are choosing programs with the College of American Pathologists accepted analytes that you need to meet your College of American Pathologists PT requirements. This applies to laboratories being accredited by the College of American Pathologists. AAB-MLE is fully accepted by all other entities and accrediting agencies.

Results of each program are mailed to the participants within 21 days of the reporting deadline. Cumulative reports demonstrating performance of the past three testing events for CMS-graded analytes are also included. Participant statistics for the entire population of subscribers, segregated according to methodology for most constituents, are available online.

The programs are designed with the flexibility to satisfy the needs of all laboratories ranging from a one-person specialty laboratory to an automated full-service laboratory. We have structured our programs to conform to CLIA '88. We are aware of the economic impact of proficiency testing on the laboratory and we have strived to make our programs as economical as possible.

In selecting programs, one should be aware of federal and state regulatory requirements. Any questions regarding appropriate programs should be addressed to your State Agency or CMS. As detailed further in this catalog, we are offering two basic types of programs:

- Five challenges per testing event which are required for all CMS graded analytes. These analytes are listed in **BOLD** in the catalog program description.
- One, two or three challenges per testing event which are not reported to CMS.

If for a regulated analyte, your laboratory changes mid-year from a non-waived to a waived method, or if the manufacturer is granted waived status, you must maintain enrollment in a five-challenge program for any remaining non-waived tests in the subspecialty as per CMS regulations.

A confirmation of your subscription will be sent to you and to the proper regulatory authorities. Notify our office if your confirmation is not received within 21 days of order placement.

The only programs available are those listed. Special or modified programs cannot be furnished. If you do not perform analysis of a constituent included in our programs, simply do not submit results for that constituent. All specimens with human blood components, except those used in the Viral Markers, HIV Markers & Oral HIV modules, are negative for HIV antibody, HCV antibody and HBsAg at the donor level.

### ORDERING INFORMATION

To place an order, go to our website at <a href="www.aab-mle.org">www.aab-mle.org</a> to use our online ordering tool, or complete an order form and send it to our mailing address with one of the following:

- 1. A check for the full amount of the order, or
- 2. A purchase order with terms of advance payment or net 30 days (payment due 30 days from receipt of order), or
- 3. Credit Card (American Express, Discover, MasterCard & Visa) information, or
- 4. Letter of authorization on company letterhead subject to same terms as purchase orders (payment due 30 days from receipt of order).

This is a **prepaid** subscription, thus, no orders will be processed without one of the above payment methods. **Online orders will ONLY be accepted with credit cards and purchase orders. Call 800-234-5315 with credit card information after submitting online order.** Orders may be faxed or emailed if accompanied by a purchase order, credit card payment or letter of authorization. The **Annual Registration Fee** is payable each year and is nonrefundable. Enrollment in previous years does not exempt payment of the registration fee.

#### ORDERING INFORMATION - continued

New account orders must be received by December 2, 2022. However, we recommend that orders be submitted as soon as possible to guarantee specimen availability. Some programs have limited quantities available. Current participants may be subject to late fees for expedited processing when renewals are submitted past the enrollment deadline.

Current 2022 participants will be automatically renewed for 2023 in current year enrollment if renewal order or notification to cancel is not received by September 9, 2022. Autorenewal invoices not paid by January 16, 2023 will not be shipped Q1 2023 samples.

Attn: Alaska, Hawaii, Canada, Mexico, US Territories and all Foreign participants – these participants will be surcharged for any costs above those normally incurred for delivery in the continental United States. US Territories are not considered part of the continental United States. If submitting a purchase order, please allow for the shipping surcharges. For specific shipping surcharges, please contact our office by calling 800-234-5315 M-F, 8am-5pm Central Time, or email <a href="mailto:customerservice@aab-pts.org">customerservice@aab-pts.org</a> or <a href="mailto:mle.org">mle@aab-mle.org</a>. All payments are to be in US dollars.

**Attn: US Government, State, County, or City Agencies** – Programs are subscription products. Please include this clause, if applicable, in your purchase order: "Amount claimed is recommended for payment in advance under the exemption from the provisions of 3 U.S. 530, stated in MP4, Part III, Paragraph 3.02."

### 2023 Ship Schedule

Chemistry & Non Chemistry	Shipping Dates	Last Day for Replacement Specimens	Cut-off Date for Results Submission	Evaluations Returned
M1 2023	February 7	February 15	February 24	March 17
M2 2023	May 16	May 24	June 2	June 23
M3 2023	September 12	September 20	September 29	October 20
Andrology,	Shipping Dates	Last Day for Replacement	Cut-off Date for Results	Evaluations Returned
Embryology		Specimens	Submission	
S1 2023	April 4	April 12	April 21	May 12
S2 2023	October 24	November 1	November 10	December 1

*Important Information* – Participants are responsible for notifying AAB when the testing kit has not been received within 3 days of the shipment date. AAB's primary carrier is UPS and the testing kits are **shipped by 2-day service**. Plan accordingly, as alternate shipping dates cannot be provided.

## Hematology Automated Differential Instruments

Hematology with automated differential programs are instrument specific. If changes occur during the year, please verify that you are still in the correct program. The following analytes are included in automated differential modules; 3-Part or 5-Part Automated Differential, Erythrocyte Count, Hematocrit, Hemoglobin, Leukocyte Count, Platelet Count.

### 3-part differentials

HEMATOLOGY WITH 3-PART DIFF [225]......\$321 5 challenges per testing event Module is compatible with the following instruments:

Abbott Cell-Dyn 610, 1200, 1400, 1500, 1600, 1700, 1800, Emerald

ABX all three-part differential models

Coulter Ac•T series (excluding Ac•T–5 & 8), J series, MD series, Onyx, S Plus series, ST series, T series

**DANAM/Infolab** – all two-part differential models

**Drew** Evolution **Mindray** BC-3200

**Nova** Celltrak

Module is compatible with the following instruments:

Sysmex E series, F-800, K series, Pochi, KX 21/21N, XP series

### 5-part differentials

HEMATOLOGY WITH 5-PART DIFF [226].....\$372 5 challenges per testing event

Module is compatible with the following instruments:

Coulter DxH 600/800/900, Gen-S, HMX, LH500, LH750/755/780, MAXM, STKS (the VCS series)

Mindray BC 5-part

HEMATOLOGY WITH 5-PART DIFF- ABBOTT CELL-DYN [223]......\$372 5 challenges per testing event

Module is compatible with the following instruments:

**Abbott Cell-Dyn** 3000, 3200, 3500, 3700, 4000, Emerald 22, Sapphire, Ruby

Danam Excell 22

HEMATOLOGY WITH 5-PART DIFF – AcT 5 AND PENTRA [228].......\$372 5 challenges per testing event

Module G is compatible with the following instruments:

**ABX** Pentra 60 C+, 80, 120 **Coulter** Ac•T 5, Ac•T 8

HEMATOLOGY WITH 5-PART DIFF – DxH 500 SERIES [227]......\$372 5 challenges per testing event

Module is compatible with the following instruments:

Coulter DxH 500 series

Anti-HBc, IgM

Anti-Hepatitis A, IgM

Anti-Hepatitis A, Total/IgG

Anti-HBs **HBeAg** Anti-HCV **HBsAg** 

### Microbiology

#### **Proficiency Testing Requirements**

Unlike other specialties under CLIA, Microbiology does not have specific analytes. Instead, laboratories are responsible for selecting Proficiency Testing that covers all aspects of testing offered by their laboratory. The general requirement that Proficiency Testing be comprised of 3 events per year with 5 samples per event applies (with the exception of Acid Fast Smears). The all aspects of testing offered requirement means that the laboratory must cover all subspecialties, all basic techniques employed and all organisms tested by the laboratory.

In order to facilitate selection of methods to cover all aspects of testing performed in your laboratory, the Microbiology Section of the catalog is organized by Sub-Specialty, then by laboratory technique. That is, you will find under Bacteriology programs covering Culture and Identification, Antimicrobial Sensitivity, Gram Stain, Direct Antigen and so on. In order to ensure that you meet the 3 by 5 sample requirement, we typically start the listing with a base program or series of base program options comprising 5 samples and offering one or more testing techniques. You should select one of those base programs that most closely reflect the level of service offered by your laboratory. Once you have established base programs, you should select additional supplemental programs to cover all aspects of testing offered by your laboratory.

If you perform only a limited test menu, please be careful in selecting programs that your selection meets this requirement for reporting five results for each basic laboratory technique and subspecialty. If you do not test all sources in a program, you must select an additional program to insure five reported results. Would Refer does not count. A variety of 5 vial programs and supplemental programs are offered to make meeting this requirement easier.

Unless you are performing waived testing only, typically a supplemental program alone will not be sufficient to meet the CLIA 3 X 5 requirement. If you perform only a limited test menu, please be careful in selecting programs that your selection meets this requirement for each basic laboratory technique and subspecialty. A variety of 5 vial programs are offered to make meeting this requirement easier.

As always, it is ultimately the responsibility of the laboratory to ensure that they are ordering an adequate selection of Proficiency Testing to meet CLIA requirements. Be aware that Deemed Accrediting Agencies will have their own additional requirements or specific interpretations of how to meet the proficiency standard. When in doubt you should discuss this with your laboratory's Deemed Accrediting Agency.

Federal law requires a minimum of five CMS regulated (non-waived methods) bacteriology challenges per shipment. Individual state laws may differ. When enrolling, ensure your order meets the requirement that is the more stringent of the two. The number of challenges is noted in parentheses. All urine culture specimens are suitable for presumptive identification and/or definitive identification.

Note: The specimens included may contain dangerous pathogens and must be treated with extreme care. These specimens must be handled and disposed of only by personnel trained to work with pathogenic microorganism.

#### BACTERIOLOGY – Culture and Identification

BACTERIOLOGY 1 [630].....\$363

6 challenges per testing event

Pure and mixed cultures will be included for identification. Sources will vary.

One of the six specimens per testing event will be for Antimicrobial Susceptibility. Additionally, one culture per event will be a mixed culture and require that all organisms found be reported. The culture quantities reflect the number of sources per event.

1 Throat Culture

1 Urine Culture

1 Genital Culture

3 Miscellaneous Cultures \*

1-Antimicrobial susceptibility

2-**Gram Stain**/Morphology

\*Possible sources include Blood, CSF, Ear, Eye

Sputum, Stool, Wound

NON-CHEMISTRY PROGRAMS - continued BOLD analytes are reported to CMS Δ - denotes Point of Care Testing or Waived Programs BACTERIOLOGY 2 [640].....\$348 **5** challenges per testing event Pure and mixed cultures will be included for identification. One of the five specimens per testing event will be for Antimicrobial Susceptibility. Per Event, samples are as follows: 2 Urine Cultures 2-Gram Stain/Morphology 2 Throat Cultures 1-Antimicrobial susceptibility 1 Genital Culture 1-Strep A Antigen Detection GENITAL CULTURE [646].....\$333 5 challenges per testing event Pure cultures for identification of genital pathogens, Strep Group B and/or Neisseria gonorrhea; 1 Gram Stain/Morphology. CMS reported. GENITAL/URINE CULTURE [653]......\$336 5 challenges per testing event Pure and mixed cultures will be included for identification. Per Event, samples are as follows: 2-Urine Culture identifications 1-Antimicrobial susceptibility 3-Genital Culture identifications 2-Gram Stain/Morphology MISCELLANEOUS CULTURES – ADD-ON [651]......\$198 3 challenges per testing event 3 miscellaneous aerobic and anaerobic cultures for identification to include Blood, CSF, Wound, Ear or Stool. Must be enrolled in 640 – 647, 652 or 653. **CMS reported.** MRSA CULTURE [695]......\$312 **5** challenges per testing event Culture swab samples for the detection Methicillin Resistant S. aureaus using ChromAgar and molecular probe methods. MRSA CULTURE - ADD-ON [696]......\$168 2 challenges per testing event Same as 695. Must be enrolled in a 5 challenge bacterial culture or antigen program. SUPPLEMENTAL BLOOD CULTURE [694]......\$159 2 challenges per testing event Lyophilized pellets with dilution buffer to simulate liquid blood samples. Must be enrolled in a 5 challenge Bacteriology Culture and Identification program. CMS reported. THROAT CULTURE [641].....\$333 5 challenges per testing event Pure and mixed cultures will be included for identification, antigen screen and/or Gram stain. CMS reported. URINE COLONY COUNT [648].....\$255 2 challenges per testing event Pure and mixed cultures in a lyophilized pellet for bacterial colony count and ID. Supplemental testing only; culture samples for supplemental testing only for ID and must be ordered in addition to another 5-vial CLIA acceptable bacteriology culture and ID program. URINE CULTURE [643]......\$333 5 challenges per testing event Pure and mixed cultures will be included for identification. Per Event, samples are as follows: 5-Culture identifications 1-Gram Stain/Morphology 1-Antimicrobial susceptibility URINE PRESUMPTIVE ID/COLONY COUNT [647].....\$393 5 challenges per testing event Pure and mixed cultures will be included for identification. # **BACTERIOLOGY – Antimicrobial Sensitivity**

# **Antimicrobial Applicability**

As indicated in CMS guidelines, participants enrolled in a Microbiology program that perform antimicrobial testing will be flagged for inappropriate selection of antimicrobial agents per CLSI Guidelines (formerly NCCLS) M02-12, M07-A10 and M100 S25. Inappropriate selection of antimicrobials as indicated by the CLSI guidelines will be scored as misses.

PARASITOLOGY - Direct Antigen/Molecular

CRYPTOSPORIDIUM/GIARDIA LAMBLIA ANTEGEN DETECTION [683]....\$360

5 challenges per testing event

Formalinized fecal specimens for analysis of Cryptosporidium and Giardia. CMS reported.

**VIROLOGY** 

SARS-CoV-2 ANTIGEN DETECTION [688]......\$336 2 challenges per testing event

Swab specimens for detection of SARS-CoV-2 by rapid antigen methods.

SARS-CoV-2 MOLECULAR DETECTION [689]......\$345 2 challenges per testing event

Swab specimens for detection of SARS-CoV-2 by molecular methods.

See Serology section above for program description.

HIV MARKERS [791] \$258 5 challenges per testing event

See Serology section above for program description.

See Serology section above for program description.

Δ RESPIRATORY ANTIGEN DETECTION – WAIVED [680]......\$225 2 challenges per testing event

Liquid specimens for detection of the following analytes using waived methods only:

Influenza Type A & Influenza Type B
Respiratory syncytial virus (RSV) antigen

**RESPIRATORY ANTIGEN DETECTION [681]......\$336** *5 challenges per testing event* 

Lyophilized vials for detection of the following analytes:

Influenza Type A & Influenza Type B
Respiratory syncytial virus (RSV) antigen

WAIVED PACKAGES

BASIC WAIVED AND PPM PACKAGE [902]......\$306 2 challenges per testing event

Multiple samples for the following analytes:

Fecal Occult Blood Urinalysis Whole Blood Glucose

PPM Urine Sediment Strep A Antigen Detection Urine hCG

WAIVED AND PPM PACKAGE [901]......\$351 2 challenges per testing event

Multiple samples for the following analytes:

Fecal Occult Blood Urinalysis Whole Blood Glucose

PPM Urine Sediment Hematocrit Strep A Antigen Detection Urine hCG Hemoglobin

ANDROLOGY AND EMBRYOLOGY AND FETAL PROGRAMS

ANTISPERM ANTIBODIES [978]......\$284 2 challenges per testing event

Liquid serum samples for qualitative IgG evaluation.

EMBRYO GRADING [984]......\$318 2 challenges per testing event

Videos for Embryo grading; multiple answers for three different days

FETAL FIBRONECTIN (FFN) [983]......\$424 2 challenges per testing event

Liquid simulated cervicovaginal specimens.

**FETAL MEMBRANE RUPTURE TEST [975]......\$384** *2 challenges per testing event* 

Samples for detection of placental alpha-1-microglobulin

Two samples of culture media and one vial of human serum albumin per shipment to challenge the laboratories ability to test media suitability for in-vitro embryo cultures.

## ANDROLOGY AND EMBRYOLOGY AND FETAL PROGRAMS - continued PREIMPLANTATION GENETIC TESTING - ANEUPLOIDY [977].......\$952 3 challenges per testing event Samples consists of extracted DNA diluted to the 5 – 6 cell level. The samples will be tested and reported for Sex and Euploid or Aneuploid status and will be graded. Can report chromosome additions or deletions for educational purpose and will not be graded. SPERM COUNT, QUALITATIVE/POST VASECTOMY [979]......\$274 2 challenges per testing event Liquid samples of stabilized sperm for qualitative post-vasectomy analysis. Required for CAP accredited laboratories. SPERM COUNT, QUANTITATIVE AND QUALITATIVE [980]......\$308 2 challenges per testing event Liquid samples of stabilized sperm for quantitative and qualitative (post-vasectomy) analysis and digital videos for Hemocytometer and Makler methods. SPERM MORPHOLOGY [981].....\$308 2 challenges per testing event Unstained semen smears on glass slides and whole slide DigitalScope<sup>™</sup> images for sperm morphology analysis. Samples are not compatible with Testsimplets. SPERM MOTILITY [985].....\$320 2 challenges per testing event Digital video for sperm motility

#### SPECIALTY TESTING

This program is designed to meet the laboratory's External Quality Assessment needs in other than the traditional proficiency testing. These are not reported to CMS.

2 challenges per testing event

GLUCOSE, WB, EQAS (MULTI-SITE) [903]......\$243 2 challenges per testing event This program is WB Glucose testing on multiple glucometers at a facility or institutions. 2 sets of samples shipped.

This allows the participant to challenge up to 20 operators and/or glucometers for testing accuracy.

SPERM VIABILITY [982].....\$308

This program is Eosin-Nigrosin stained slides featuring DigitalScope<sup>TM</sup> images.

This is an externally graded program, but for internal use only. Samples ship with Chemistry/NonChemistry events.
